Research Experience

Research Assistant, Brown University

Professor David Weil, Summers 2018 and 2019

Research Assistant, University of Oulu

Professor Ilmo Mäenpää, Spring 2016

Professor Rauli Svento, Fall 2015

Professor Mikko Puhakka, Summer 2014

Teaching Experience

Teaching Assistant, Brown University

Intermediate Microeconomics (Mathematical), Professor Rajiv Vohra, Spring 2023

Mathematics for Economists (graduate course), Lecturer Alex Poterack,
Fall 2018 and Fall 2022
Economic Growth, Professor David Weil, Fall 2021
Essential Mathematics for Economics, Lecturer Alex Poterack,
Fall 2019, Spring 2020, and Summer 2021
Economania (Summer course for high school students), Summer 2019
Economic Development, Professor Louis Putterman, Spring 2019

Teaching Assistant, University of Oulu

Economic Theory II (macro), Professor Mikko Puhakka,
Fall 2014 and Fall 2015

Invited Seminars and
Conference Presentations

2023: PAA Annual Meeting[†], ECINEQ Meeting
2022: PAA Annual Meeting
2021: Stone Center on Socio-Economic Inequality at City University of
New York[†], Max Planck Institute for Demographic Research[†]

Professional Activities

Referee

Journal of Economic Growth

Awards and
Fellowships

Brown University Merit Dissertation Fellowship

Spring 2022

Working Papers

Job Market Paper 1: *Population Aging, Cohort Replacement, and the Evolution of Income Inequality in the United States* [Latest version]
with Matthias Schief

This paper examines the impact of demographic change on household income inequality in the United States, both historically and prospectively. We emphasize the distinct roles of population aging and cohort replacement and develop a methodology to study their joint compositional effect. We document that cohorts born later in the 20th century embody higher levels of income inequality compared to earlier-born cohorts, and we argue that most of the increase in inequality over the past two decades can be accounted for by demographic change. Moreover, we predict that future demographic change will continue to put significant upward pressure on household income inequality in the United States.

Job Market Paper 2: *Subgroup Decomposition of the Gini Coefficient: A New Solution to an Old Problem* [Latest version]
with Matthias Schief

We study inequality decomposition by population subgroups. We define properties of a satisfactory decomposition and ask what these properties imply for the decomposition of familiar inequality indices. We find that the Gini coefficient, the generalized entropy indices, and the Foster-Shneyerov indices all admit satisfactory decomposition formulas derived from a common set of axioms. While our axiomatic approach recovers the known decomposition formulas for the generalized entropy and the Foster-Shneyerov indices, it leads us to a novel decomposition formula for the Gini coefficient. The decomposition of the Gini coefficient is easy to compute, and it has both a geometric and an arithmetic intuition.
